### **Project Title: Muriel Cooper Website**

[https://en.wikipedia.org/wiki/Muriel\\_Cooper](https://en.wikipedia.org/wiki/Muriel_Cooper)

I'd like to build this site as multiple pages, with navigation at the top in a typical format. Each page will have a summary paragraph, with visuals. Since Muriel Cooper was a designer, there are a lot of great examples of her work that can be used throughout the site to keep it engaging.

#### **Home Page**

- Mainly visual, her name in a large, interesting font
- Short byline, introducing her as a designer and lasting impact

#### **Early Life**

#### **MIT Press**

#### **Visible Language Workshop**

#### **MIT Media Lab**

#### **Legacy**

#### **Sources**

- list sources, including the Wikipedia page and photography
